

Why Choose Honda Assure ?

Honda has always believed in structuring its programme around your requirements and comfort, and following the same footsteps, Honda Assure is designed with features to create a benchmark.

Instant policy issuance

Insurance companies mostly issue manual cover notes (which are valid for 60 days) at the counter and customers have to wait for a substantial number of days before they receive the actual policy schedule. Sometimes, due to poor carrier service, customers do not receive their policy schedules at all. In such cases, the legal hassles which customers face while in a claim situation can be easily imagined. With all Honda Assure operations processed through a custom-designed, dedicated online application, cover notes are done away with completely, and it takes only 5 minutes for the policy schedule to be printed and handed over to the customer.

Nearly cashless repairs

Are you sure if the 'cashless repair' promised by your Insurance Company is valid across all Dealerships in India? Or whether this 'cashless repair' can be availed of at a Honda Dealer Workshop at all? In the unfortunate event of an accidental damage, a Honda Assure policy ensures that your vehicle is repaired only at a Honda Dealer Workshop, and you get nearly cashless repair facility* at any Honda Dealer Workshop across the length and breadth of the country. Customers only need to pay the policy excess (fixed as per Tariff according to the cubic capacity of the vehicle) and applicable depreciation depending on the age of the vehicle.

Seamless service

Customers can avail of all insurance services like issue of new car policy, renewal of existing policy, endorsements and claim settlement at any Honda Dealership across the country. The range of services covers everything, right from policy issuance to emergency assistance to post accident repairs and claim settlement.

Transparent claim settlement

The claim settlement process in Honda Assure is fair and transparent (liability of the customer is as per standard). Fair clarification of the parts and labor rates charged are admissible by the Insurance Companies. It means customer is not forced to pay any unnecessary cost of repair/replacement. In case of any doubt or difference Brokers shall assist to take up with Insurance Companies.

Re-categorized parts

For your benefit, we have also re-categorized some of the more damage-prone parts for lower depreciation so that you save more. For example, bumper is re-categorised as a fiber part (having 30% depreciation which is payable by customer), as against a plastic part (50% depreciation payable by customer). What's more, with Honda Assure, you also get 50% of the cost of any consumables or fasteners which might have needed replacement in an accident.

Quality repairs at Honda Dealer Workshops

No one knows your Honda better than Honda. Which is why Honda Assure makes sure that in the unfortunate event of an accidental damage, your car is attended to only at a Honda Dealer Workshop. All our modern, hi-tech workshops are equipped with latest, state-of-the-art equipments, and we make sure your car is taken care of only by Honda-trained technicians using genuine Honda parts.

Add-on covers

What if for a little more money, all those depreciable amounts vanish from the bill? Honda Assure has just the right product for you – the “Nil-Depreciation” cover. For a little extra premium, all depreciation chargeable as a normal course in an accident repair bill is waived. You also get full coverage for any consumables or fasteners replaced. All you need to pay for is the policy excess (Rs.500 for Jazz and City, Rs.1000 for Civic, Accord and CR-V) fixed as per Tariff according to the cubic capacity of the vehicle.

Above all, we assure you quality in all our processes, the hallmark of Honda, with the sole objective of ensuring your peace of mind.
